

Le
SQUARE
Spa

Le Square Spa opens the doors to a world of serenity, where the art of care draws its inspiration from Moroccan traditions and the treasures of nature. Immerse yourself in a realm of relaxation where ancient traditions and natural treatments come together to awaken your senses.

The spa offers an authentic experience centered around the Moroccan hammam, a true ritual of purification, complemented by facial treatments with natural formulas and soothing massages, all designed as a journey where time stands still to harmonize body and mind.

A precious retreat to reconnect with yourself, at the pace of calm and elegance.

Bespoke Facial Treatments

Our facial treatments combine expert manual techniques with bespoke therapies for a fully personalized care experience. Each session begins with a thorough skin analysis, followed by a treatment tailored to your every desire and need, using natural products enriched with Argan oil and Prickly Pear oil.

Accompanied by a series of expert techniques, our treatments deliver essential nutrients deep into the skin, promoting its optimal function and leaving it beautifully radiant.

Express Radiance Treatment

30 mn - 500

An express treatment that, in minimal time, delivers all the benefits of a full facial for an instant glow. Gentle massage techniques and rhythmic pressures stimulate lymphatic circulation and help drain toxins, followed by expert care for the face, neck, and décolleté to restore luminosity.

Hydrating Argan Facial

60 mn - 700

A hydrating and relaxing facial using Argan oil, designed to purify the skin and enhance the complexion's natural radiance. Reflexology massage of the facial zones provides deep well-being. The ritual is completed with a luxurious hand treatment (scrub, mask, and massage) and a soothing scalp massage.

Prickly Pear Anti-Aging Treatment

60 mn - 900

A powerful anti-aging treatment that prevents and corrects the main signs of skin aging, harnessing the renowned benefits of Prickly Pear. Relaxing, regenerating, and lifting, it stimulates collagen production, smooths wrinkles, and firms the skin. The complexion becomes radiant, and the skin is visibly refined. The ritual is completed with a pampering hand treatment (scrub, mask, and massage) and a soothing foot massage.
